### **TRI-STATE BUILDING CORPORATION RECEIVES HONORS WHILE PARTICIPATING IN EDUCATIONAL WORKSHOPS AND SEMINARS**

#### **Wick Buildings Annual Meeting held in Scottsdale, Arizona**

MAZOMANIE, Wis. (March 2, 2012) – Understanding customer needs, innovative new building products and customer service techniques were among the topics presented in workshops during Wick Buildings 2012 Annual Meeting. The program was held at the Scottsdale Plaza Resort in Scottsdale, Arizona, February 19, 20 and 21. It was attended by more than 140 builders and industry participants from the heartland of the United States, ranging from Colorado to Ohio.

“Dale and Marilyn Junk of Tri-State Building Corporation in Bellevue, Iowa participated in many workshops and cross-functional discussions,” said Tom Wick, President and General Manager for Wick Buildings, LLC. “In addition, they were honored for several accomplishments in 2011 including 15 Years Longevity and also received Elite and Star Builder Awards.”

Elite and Star Builder status is achieved by only a select group of top performing Wick Builders each year. Longevity awards celebrate the number of years that each Builder has been a partner of Wick Buildings.

Mr. Wick also noted, “We were honored to have Max Armstrong, a leading international voice in agriculture, personally share his knowledge and insights with us at this year’s meeting.” Mr. Armstrong was the keynote speaker at the meeting and led an interactive workshop on how builders can participate on a local, regional and national level in shaping the future of agriculture.

“Continuously improving the quality of the product and services we provide through innovative building materials and practices is at the heart of our record growth in the past year, and it will allow us to continue to grow and deliver more value to our customers,” Mr. Wick emphasized in his closing comments.

In continuous operations since 1954 and with more than 68,000 buildings completed, Wick Buildings provides post-frame structures for agricultural, dairy, equine, residential storage, municipal, commercial and light industrial markets. Wick Buildings are sold by independent builders, and built by independent builders and Wick crews who live and work in their local communities.
